~IMPORTANT INFORMATION REGARDING OUR SCHOOLS~

Dear Fair Haven Families,

Please see the following important information regarding our schools:

Public Notice on the District's Recent Lead Testing:

The State of New Jersey adopted regulations mandating testing for lead levels in drinking water in all public schools throughout New Jersey. This mandate also requires school districts to publicly report the findings of that testing, as well as to take any remedial actions necessary as a result. This mandate is in addition to the general municipal water testing that is completed regularly by our public water service providers.

Our district complied with this mandate by conducting our lead testing over this year's Spring Break. We received the results of our testing on April 25, 2022. While the full results and reports may be found on our district website for your review, I wish to offer a brief synopsis of the findings:

All water sites at Knollwood School were found to be below the limit set by the EPA of 15 parts per billion (ppb) and have been deemed safe requiring no further action by the district. Two water sites at Sickles School were found to have levels above the limit set by the EPA of 15 parts per billion (ppb) and do require further action to remediate the sites for safety. The sites, levels and actions are as follows:

Site	Levels	Action
Water fountain outside Room 225 2nd floor	47.3 ppb	• Fixture decommissioned (water shut off) • Fixtures will be checked/replaced • Site will be retested
Room 222 2nd floor	21.4 ppb	• Fixture decommissioned (water shut off) • Fixtures will be checked/replaced • Site will be retested

We are committed to the health and well-being of our students, staff, and school community as a whole and wish to share that it is important to note that neither of these 2 fixtures were available for student use as the water fountains had been turned off due to COVID restrictions and the sink fixture is in the new addition at Sickles and is not used for ingestion.

A copy of the test results is available in our board office for inspection by the public, including students, teachers, other school personnel, and parents, and can be viewed between the hours of 8:30 a.m. and 4:00 p.m.Mondays through Fridays and will also available on our website beginning next week at: https://www.fairhaven.edu/district/administration/business_office_school_budget. For more information about water quality in our schools, please feel free to contact my office.

For more information on reducing lead exposure around your home and the health effects of lead, visit EPA's Web site at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your healthcare provider.

Except for the parameters tested, PAS makes no representation as to the fitness or quality of the water sample taken.

PQL = Practical Quantitation Limit
MDL = Minimum Detection Limit
MCL = Maximum Contaminant Level
DF = Dilution Factor
ND = Analyzed for but not detected
J = Estimated result
* Federal Action Level

All samples are analyzed in accordance with New Jersey Department of Environmental Protection Protocol

Except for the parameters tested, PAS makes no representation as to the fitness or quality of the water sample taken.

PQL = Practical Quantitation Limit
MDL = Minimum Detection Limit
MCL = Maximum Contaminant Level
DF = Dilution Factor
ND = Analyzed for but not detected
J = Estimated result
* Federal Action Level

All samples are analyzed in accordance with New Jersey Department of Environmental Protection Protocol

Mark D. Feitelson, Lab. Director
